ABENA®

ABENA San, Special, light green colourcode, Premium

- ✓ Designed for faecal incontinence
- ✓ High-performance core with Top-Dry Technology
- ✓ Unique leakage barriers with built-in pockets
- ✓ Support healthy skin balance
- ✓ Odor Control

Product Description

ABENA San Special is our anatomically shaped pad specifically designed for faecal incontinence. The pad can be used for both faecal and urinary incontinence and features a light green textile-like breathable backsheet foil for optimum comfort and discretion. The pad has effective leakage barriers with built-in pockets that keep the faecal contents inside. The high performance core with Top-Dry Technology ensures skin integrity and optimal skin care by keeping the exposed area comfortable and dry even after multiple voids. The fully breathable pads are fitted with standing leakage barriers combined with front and rear built-in cross barriers offering a 360° leakage protection. When combined, these functionalities help protect the skin and maintain a natural pH skin balance. The Odor control system minimises unpleasant smells. The wetness indicator guides the user and caretaker to the product with the adequate absorption level and product changes. The dermatologically tested products have been given the Nordic Swan Ecolabel. ABENA San Special should always be used with special fixation underwear, like our Abri-Fix products, to ensure a tight fit and reduce the risk of leakage.

Specifications

Brand	ABENA
Sub-Brand	San
Size	Special
Colour	Green
Features	Light green colourcode
Material	Breathable textile backsheet (BTBS), ECF fluff, elastane, non-woven, PE, PP, resin, SAP

Storage Instructions	Store dry, room temperature and no sunlight.
Product Disposal Instructions	Can be disposed of with normal household waste sorted according to local regulations.
Packaging Disposal Instructions	Can be recycled or incinerated.

Instructions for use/application

Double incontinence pad designed for combined faecal and urinary incontinence. Easy product recognition by colored backsheet foil and printed naming. ABENA San Special should always be used with special fixation underwear, like our Abri-Fix product line. The fixation pants ensure a tight fit and reduce the risk of leakages. Pull fixation pants halfway up the legs. Fold the pad lengthways to create a bowl shape. Pass the pad between the legs from front to back. Position the upper rear end of the pad at the tailbone. Fan out the back of the pad horizontally to create a channel shape between the legs. Use the wetness indicator to check if the product is applied accurately in the center. Fan out the pad horizontally at the front. Pull the fixation pants up into position. See the application guide in our brochure for detailed information.
