

Overbed/Over Chair Tables

Description	Product Code
Overbed/Over Chair Table - Beech and White Frame	S37779
Overbed/Over Chair Table - Dark Oak and Black Frame	S37781

Features and Benefits

- Contemporary design of two colour options with laminate tabletop to suit most interior decor
- Dual-column design to allow tilting in either direction for use on either side of a bed or chair
- Adjustable height to suit different size chairs and beds
- Locking castors for both mobility and stability, with optional slider feet included for use with divan beds
- Painted metal and laminate parts for durability and ease of cleaning

Product Description

Contemporary design tables of two colour options. Used for working, eating or reading. This design uses an adjustable height dual-column design to allow the table to fit over most beds and chairs and tilt in either direction. This means that it will work on either side of the bed or chair. Each table top has two raised edges to hold documents when using the table tilted. A pair of simple handwheels allow the user to adjust the height and tilt of the table to suit different users and different size beds and chairs. We include the simple tool needed to assemble these products.

The tables have four castors for mobility when needed, and two castors have a lockable brake for stability when the table is in use. We also include optional slider feet in place of the castors to allow the tables to work with divan beds.

Castors fitted

Slider feet fitted
