Installation Methods

Your doorbell and pager are already paired to the bell push. To add additional chime units or pagers, please follow the pairing procedure at the end of this manual.

Chime Unit
Simply plug the chime unit into any mains socket and switch the socket 'On'.

Vibrating Pager
Remove the battery cover on the rear of the pager unit and insert 2 x AAA batteries, observing the correct polarity. Replace the battery cover. Slide the power switch on the side of the pager to the 'On' position.

Bell Push
Remove the small, white battery tab and **check a suitable range exists** before mounting the bell push. The bell push should ideally be mounted in an area protected from extremes of weather.

Mounting using the provided screws (preferred):
Remove the cover of the bell push using a small, flat head screw driver and remove the battery. Locate the two mounting holes and use these as a template to mark the mounting surface.

Drill two holes in the marked position and mount the bell push using the screws and wall plugs provided. Replace the battery in the bell push and re-attach the cover observing the correct orientation.

Mounting using the adhesive pad:
Thoroughly clean the area for installation and affix the adhesive pad to the bell push. Firmly push the bell push against the area for installation and hold for 10 seconds.

Operating Instructions

Adjusting the Volume
The volume control is the upper button on the left side of the chime unit and the upper button on the rear of the vibrating pager (under the belt clip).

Press the button to switch between the 4 volume levels.

Selecting the Melody
The melody control is the lower button on the left side of the chime unit and the lower button on the rear of the vibrating pager (under the belt clip).

Press the button to select one of the 52 melodies.

Pairing the Bell Push and Chime/Pager
According to which item you wish to pair, push and hold the volume control on either the chime unit or vibrating pager for 5 seconds, until the light/LED begins to flash. The volume control is the upper button on the left side of the chime unit and the upper button on the rear of the vibrating pager (under the belt clip).

Trigger each bell push you wish to pair in sequence. After each push the receiver will chime to confirm the pairing.

To confirm the settings, push and hold the volume control on either the chime unit or vibrating pager for 5 seconds.

The above procedure can be used to add a number of chime units, vibrating pagers or bell pushes.

To clear all settings, push and hold the melody control for 5 seconds. The unit will pair with the next bell push activated and set the default 'Ding Dong' melody.

Specifications

Parameter	Flashing receiver	Vibrating receiver	Transmitter
Voltage	AC 110V/ 220V	3V DC power (AAA batteries*2)	12V 23A (alkaline battery*1)
