# EM300 Alphanumeric Pager - User Guide

USING THE PAGER

First remove the battery cover then insert the AAA battery in the battery compartment observing the polarity marking. The pager will boot up after a couple of seconds with a tone and vibrate alert and display of any text entries.

If the pager receives a message it will store it in it's memory unless deleted. The table below shows two methods of clearing messages and cancelling alarms. One, is as message is received, the other for a stored message causing a reminder.
