

**Giant Sensory Den - SD03**  
**Dimensions 120X100X180cm**  
**Material: 210T polyester taffeta with silver coated flame retardant, 19mm PVC rod, PE floor.**

Carry bag included

**Inside the carry bag you will find:**

8 X corner connectors

16 X straight connectors

28 X poles

1 X giant flame retardant dark den

**The Giant Sensory Den blocks light from entering providing a cosy, dark and safe place free from distractions. Or a place to enjoy visual and sound stimulation, including UV light sources.**

**Assembly is simple just follow these 4 easy steps.**

**Step 1.** Lay the giant sensory dark tent flat and thread two poles connected in the middle by a straight connector through each side of the roof and connect each of the four corners by a corner connector.

**Step 2.** Turn over your giant sensory den so that the black PE flooring is facing up. Repeat step 1 by threading the pvc rods through the sleeves on the bottom of the giant sensory den and then apply the four corner connectors.

**Step3.** Connect 3 poles together using two straight connectors. Repeat this to make four long upright poles. Then thread them through the upright sleeved in your giant sensory den and connect to the corner connectors.

**Step 4.** Connect the uprights to each of the corner connectors at the top and the bottom. Make sure your giant sensory den is the correct way around with the black PE flooring at the bottom.

ENJOY YOUR GIANT SENSORY DEN!
