

## **Fitting instructions for Evacuation Overlay (EVO).**

This Evacuation Overlay is designed to be permanently in place on top of a traditional Sprung mattress

- Remove all bedding, sheets and pillows from the bed.
- Lay the Evacuation Overlay (EVO) on top of existing mattress red side down, with foot pocket at foot end of bed.
- Release tucks/hook & loop straps down side of bed and tuck in under existing mattress.
- Make bed as usual.

### **In an emergency**

- Locate foot pocket at foot end of bed and place patient's feet inside for security.
- Pull tucks from under sides of existing mattress.
- Wrap tucks tightly! over patient and secure with hook and loop fastenings.
- Locate pulling straps at both ends of bed.
- With one carer at the foot end and one at the head end pull to safety by strong looped pulling straps.
