

# IIIT

The Ultimate Personal Safety Alarm

Product Code: AL00016

## Introduction

The Defender IIIT is fitted with a high intensity strobe bulb that produces a flashing light when the 140dBs\* alarm is activated. The Defender IIIT uses a traditional ripcord activation and has an independent torch function.

The Defender IIIT is Sold Secure and Secured by Design, please see the following websites for more information: [www.securedbydesign.com](http://www.securedbydesign.com) and [www.soldsecure.com](http://www.soldsecure.com)

## Operation

1. To operate the alarm, simply pull the ripcord pin out of the socket. To stop the alarm sounding, replace the ripcord pin into the socket on the top of the alarm.
2. To use as a torch, simply press in the button on the side of the unit.

## Keyring attachment

Attach the key ring provided to the bottom of the alarm, and then attach this to your bag strap. Hold the ripcord or attach it to yourself with the G-Clip. If the bag is snatched, the ripcord pin is removed which will activate the alarm and strobe lights will flash to shock and deter the attacker. The alarm will remain attached to the bag which is likely to cause the thief to drop the item to get away from the alarm.

## Mounted alarm

The alarm can be attached to a fixed point such as a wall to act as a panic alarm. The easy-use bracket can be screwed to a wall and the alarm easily slides into the bracket and can be removed again by opening the crocodile clip on the reverse of the handle. The ripcord will be at the top of the alarm and hang down the side of the alarm. To activate, pull the cord upwards.

## Battery installation / replacement

1. Loosen the two screws on the back cover of the alarm with a small Phillips or Pozi screwdriver to access the battery compartment.
2. Remove the old battery and insert a fresh 9V battery in the same polarity.
3. Refit the back cover and tighten screws.

## WARNING

The high output siren fitted to this quality personal alarm may cause ear damage if used at close range for a prolonged period of time. Keep away from children and pets ears. This product is designed for use as a deterrent; it does not guarantee protection or personal safety.

## CAUTION

- When testing the alarm, make sure you hold it at least at arm's length away from your ear.
- The power source or propellant has a finite / limited life.
- DO NOT MODIFY THE ALARM.
- The alarm should be kept out of reach and audible range of children and pets.

### Note:

Performance may be adversely affected following prolonged exposure to extreme temperatures.

## Personal safety alarm guidance

It is advised that use of an audible personal alarm should not be relied on as the sole means of preventing an attack and should be used in conjunction with other precautionary measures. Please note the following advice:

### General use

- Always have the alarm close to hand and ready for use.
- Plan your route / journey in advance.
- Tell someone where you are going and what time you will be back.
- Walk with confidence.
- Be alert.

### When in your car

- Always have the alarm close to hand and ready for use.
- Always park in well lit areas.
- Have the keys ready as you approach your car.
- If another vehicle (including the police) is signalling you to stop, do not pull over in an isolated spot, wait until you reach a safe area.
- Be alert at all times.

### Before you use your alarm

- Be sure you know how to activate and de-activate the alarm.
- Make regular checks on power and at the first indication of a weak sound, replace the battery.
- Practice appropriate means of carrying the alarm ready for use.

## Remember

Personal safety alarms are designed for use by individuals who are under threat from attack and should be used with care and responsibility. It is intended to shock and disorientate an attacker to provide a distraction so that the user can make an escape.

It is not intended to be used as a distress signal for attracting help and attention. However the noise may induce fear of intervention and detection of others so this is an opportune secondary function.

**DON'T FORGET AN AUDIBLE PERSONAL ALARM SHOULD NOT BE EXPECTED TO PROVIDE A COMPLETE SAFEGUARD AGAINST ASSAULT AND USERS SHOULD ALWAYS TAKE SUITABLE PRECAUTIONS TO REDUCE THE RISK OF ATTACK.**
