1. IMPORTANT SAFETY INSTRUCTIONS

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury, including the followings:

- 1) Read and understand all the instructions.
- 2) Follow all warnings and instructions marked on the product.
- 3) Unplug this product from the wall outlet before cleaning.
Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
- 4) **To avoid hearing damage, please make sure anyone who uses this product is aware that the product can produce loud sound when Audio boost function is on.**
- 5) Do not use this product near water (for example, near a bath tub, kitchen sink, swimming pool).
- 6) Do not expose the telephone to direct sunlight or extreme cold environment. Do not put the telephone close to a heating source such as radiators, cookers, etc.
- 7) Do not overload wall outlets and extension cords as this can result in the risk of fire or electric shock.
- 8) NEVER use your phone outdoors during a thunderstorm-unplug the base from the telephone line and the mains socket when there are storms in your area.
- 9) Do not use the telephone to report a gas leak in the vicinity of the leak.
- 10) **Use only the supplied NiMH (Nickel Metal Hydride) batteries!**
The operation periods for the handsets are only applicable with the default battery capacities.
- 11) **The use of other battery types or non-rechargeable batteries/ primary cells can be dangerous.** These may cause interference and/or unit damages. The manufacturer will not be held liable for damage arising from such noncompliance.
- 12) Do not use third party chargers. The batteries may be damaged.

- 13) Dispose of batteries safely. Do not immerse them in water, burn them, or put them where they could get punctured.

2. POWER FAIL BACK-UP

Lets you make calls during a mains power interruption with your phone.

This power fail back-up function should work within first 4 hours* of mains power interruption.

During a mains power interruption, you put your cordless handset onto the base unit, so you can make calls even when the power is out.

Notes:

*: the period of power fail back-up for basic call operation depends on the nearby environment, battery level and phone settings.

If it is out of the base unit , the registered handset(s) will display **“PUT ON BS TO POWER”** when mains power interruption occurs. Place the handset with sufficient battery power (not lower than ) onto the main base unit to activate Power Fail Back-Up and start up the base.

If handset is already on the main base unit it will automatically activate the Power Fail Back-Up mode (if it has sufficient battery power) and start up the base until handset shows **“POWERING NO PICK UP”**. If more than 1 registered handset, the other handset will show **“POWER OUTAGE”**.

Make a call using Power Fail Back-Up mode through Handset only

Once the handset is placed onto the main base unit, enter the telephone number, and then press  . The speakerphone will be turned on automatically and call is made.

Answer a call using Power Fail Back-Up mode

1. When the phone rings, keep the handset on the main base unit and press  to answer the call. The speakerphone will be turned on automatically and call is answered.

2. To end the call, press .

- Power Fail Back-Up mode will not work if the handset battery power is not sufficient.
- Do not pick up the power supplying handset from base when Power Fail Back-Up mode is activated.
- In power failure back-up mode, **none of the base functions, including the answering machine will operate.**

- It may take up to 90 seconds to transition through the power fail back-up activation process as the base and handset(s) synchronise with each other.
- If there is more than one handset registered to the base, the handset on the main base unit should be left as a power supply of the base and you can use the other handset(s) to make calls like normal.
- The handset should always remain on the main base unit during a call.

3. LOCATION

For maximum coverage and reduce the interference, here are some guidelines you should consider when you place the base unit,

- place it at a convenient, high, and central location with no obstructions between the handset and base unit in an indoor environment.
- place it away from electronic appliances such as televisions, microwave ovens, radios, personal computers, wireless devices or other cordless phones.
- avoid facing radio frequency transmitters, such as external antennas of mobile phone cell stations.
- avoid plugging it into the same circuit as other major household electrical appliances because of the potential for interference. Try moving the appliance or the base unit to another power outlet.

If the reception for a base unit location is not satisfactory, move it to another location for better reception.

Depending on the surrounding conditions as well as spatial and structural factors, the range may be reduced. The range indoors is normally less than outdoors

4. INSTALLING YOUR PHONE

4.1. Installing and Charging the Batteries

- 1) Slide down to open the battery compartment cover.
- 2) Place the 3 supplied AAA-size NiMH rechargeable batteries as indicated. Pay extra attention to direction of polarity.

3) Slide the battery compartment cover back.

4) Put the handset on the base and charge for 15 hours before using the handset for the first time.

Notes:

1) **Use only the supplied NiMH rechargeable batteries.**

2) If the handset will not be used for a long time, disconnect and remove the batteries to prevent possible leakage.

4.2. Connecting the Base Station

1) Plug one end of the telephone line cord into the telephone jack on base bottom.

2) Plug the small end of power adapter into a power jack on base bottom.

3) Plug the large end of power adapter into a wall power outlet.

4) Plug the other end of the telephone line cord in to the telephone jack or micro-filter.

5) Always use the cables provided in the box.

4.3. Connecting the Charger

Plug the power adapter into a mains socket.

If you have a Broadband line

If you connect your telephone to a line with a broadband connection, you will need to insert a micro-filter between the telephone and the telephone line, otherwise you may get interference between the telephone and the broadband, which could cause problems.

In a fixed with broadband, every telephone must have a micro-filter connected, not just the one at the telephone point that your modem is connected to. If you need more broadband micro-filters, contact your broadband supplier.

5. GETTING TO KNOW YOUR PHONE

5.1. Handset Overview

1 INCOMING CALL LIGHT

- Flashes when there is an incoming call/ the base is paging the handset.

2 CHARGE LIGHT

- On when the handset is charging in the charger or base.

3

- In menu mode: Press to scroll up the menu items.
- In ringing mode: Press to increase ringer volume of handset.
- While entering names or numbers in the phonebook: Press to move the cursor to the left.

4

- In idle mode: Press to access phonebook

5

- During a call: Press to end a call and go back to idle screen.
- **In editing/predialing mode: Press to clear a character/digit.**
- **In menu/editing mode: Press and hold to go back to idle screen.**
- In ringing: Press to suppress handset ringer.

6

- In menu mode: Press to scroll down the menu items.
- In idle mode: Press to access the redial list.
- In ringing mode: Press to decrease the ringer volume of handset.
- While entering names or numbers in the phonebook: Press to move the cursor to the right.

7

- In idle/pre-dialing mode: Press to make a call.
- During ringing: Press to answer a call.
- During a call: Press to turn on/off the speakerphone.

8 **OK MENU**

- Press to select a menu item.
- While in a menu: Press to select an item or save an entry or setting.

9 **A, B, C, D**

- Press to dial out phone number stored in memory A, B, C, or D.

10 ALPHANUMERIC KEYPAD/ */

- In idle / pre-dial / editing mode / during a call: Press to enter characters /numbers.
- Press any key to answer an incoming call.
- Press * to switch between upper case and lower case while entering characters.
- During a call: Press and hold # to answer an incoming call when you receive a call waiting alert*.

11

- Press to enhance the clarity and loudness through earpiece during a call.

Warning: The product may emit high volume of sound. Take Extra Care when you use audio boost key, recommend you to adjust suitable volume by setting minimum, and then turn on audio boost key.

7. USING YOUR PHONE

7.1 Set Date & Time and Language

7.1.1 Set Date & Time

1. Input Date, Time directly after first time power up

OR

1. Press **OK** on the handset in idle mode.
2. Press **▲** or **▼** to select **HS SETTING**, then press **OK**.
3. Press **▲** or **▼** to select **DATE&TIME**, then press **OK**.
4. Press **▲** or **▼** to select **SET DATE**, then press **OK**, Input the day, month, year, then press **OK**, input hour (24HR format), and minutes, then press **OK**, You hear confirmation tones.

Note: if digit is input wrong during input Date or Time, you can press **▲** or **▼** to select the right position and input correct digit.

7.1.2 Change language

1. Press **OK** on the handset in idle mode.
2. Press **▲** or **▼** to select **HS SETTING**, then press **OK**.
3. Press **▲** or **▼** to select **LANGUAGE**, then press **OK**.
4. Select the desired language and press **OK**. You hear confirmation tones.

Note: When language is changed, texts of LCD screen, talking digit, and default outgoing message of answering machine will be changed accordingly.

7.2 Make, Answer, End a Call

7.2.1 Make a Call

7.2.1.1 Preparatory Dialing

Handset: Enter the phone number and press  to dial the number. Press  to clear the entry.

7.2.1.2. Direct Dialing

Handset: Press  to take the line and enter the phone number.

7.2.1.3. A, B, C, D key Dialing

Press A, B, C, D key on handset or Photo A, B, C, D key on base to dial.

Note: Before dialing, programming of A, B, C, D keys is required, refer to Section 7.3.

7.2.1.4. Speed dial key Dialing (Key 1 to Key 9)

Long press Key 1, or,Key 9 on the handset to dial.

Note: Before dialing, programming of key 1, ...key 9 is required, refer to Section 10.5 and 11.

7.2.2. Answer a Call

Using Cordless Handset:

If the handset is not on the charging cradle, when the phone rings, press .

Using Telephone Base:

Press  to answer a call.

7.2.3. End a Call

During a call connection,

Using Cordless Handset:

Press  OR put the handset on the charging cradle to end a call.

Using Telephone Base:

Press  to end a call.

7.3. Set Photo A, B, C, D key memories

This feature is VERY convenient to know who calls you if his/her telephone number is stored and voice is recorded in 1 of 4 photo keys.

You can program telephone number and record your voice through the handset.

For other operations, they are controlled through the handset only.

7.3.1. Through handset

7.3.1.1. Input number and name

1. Press **OK** on the handset in idle mode.
2. Press **▲** or **▼** to select **DIRECT MEM**, then press **OK**.
3. Press **▲** or **▼** to select **A, B, C, D**, then press **OK**.
4. Select **ADD**, then press **OK**, enter the telephone number, then enter his/her name, then press **OK**. You hear confirmation tones.

Note: during entering number or name, you can correct a number or a letter by pressing , then last number or letter will be removed.

7.3.1.2. Record your own voice tag

1. Continue section 7.3.1.1., press **OK**.
2. **VIEW** appears, press **▲** or **▼** to select **VOICE TAG**, then press **OK**.
3. Press **▲** or **▼** to select **RECORD**, then press **OK**.
4. **RECORDING...** will appear, then you can speak (better with louder voice) after beep tone in front of handset microphone area (near key 0).
5. Press **OK** to finish recording.
6. Your recorded voice will be playback automatically.

Note: 15 seconds approx. recording time per memory.

When calling number matched to photo A, B, C, D, ringing sound with recorded voice will be announced from handset and base until you press  on handset or  on base to answer.

7.3.1.3. Play Voice tag

1. Press **OK** on the handset in idle mode.
2. Press **▲** or **▼** to select **DIRECT MEM**, then press **OK**.
3. Press **▲** or **▼** to select **A, B, C, D**, then press **OK**.
4. **VIEW** appears, then press **▲** or **▼** to select **VOICE TAG**, press **OK**.
5. **PLAY** appears, then press **OK**.
6. **PLAYING VOICE TAG...** will appear. The recorded voice will be playback.

7.3.1.4. Delete Voice tag

1. Repeat the step 1 to 4 in Section 7.3.1.3.
2. **PLAY** appears, then press **▲** or **▼** to select **DELETE**, press **OK**.
3. **RESET TO DEFAULT** will display. You hear confirmation tones.

7.3.1.5. View record of Photo memory

1. Press **OK** on the handset in idle mode.
2. Press **▲** or **▼** to select **DIRECT MEM**, then press **OK**.
3. Press **▲** or **▼** to select **A, B, C, D**, then press **OK**.
4. **VIEW** appears, then press **OK**.
5. Record (name and number) will show.

Press  to return previous menu or long press  to return to standby mode.

7.3.1.6. Edit record of Photo memory

1. Press **OK** on the handset in idle mode.
2. Press **▲** or **▼** to select **DIRECT MEM**, then press **OK**.
3. Press **▲** or **▼** to select **A, B, C, D**, then press **OK**.
4. **VIEW** appears, then press **▲** or **▼** to select **EDIT**, then press **OK**,
5. Edit number, then press **OK**.
6. Edit name, then press **OK**.

Press  to return previous menu or long press  to return to standby mode.

Note: during entering number or name, you can correct a number or a letter by pressing , then last number or letter will be removed.

7.4. Adjust Earpiece and Handsfree Volume

There are 6 levels to choose from for earpiece volume in Cordless handset and handsfree volume, through volume slide switch (refer to Section 5.1 and 5.2).

During a call:

Using Cordless Handset:

Slide up and down  to select volume 1-6. The current setting is shown in LCD.

Using telephone base:

Slide up and down  to select volume 1-6.

7.5. Audio Boost

Use the audio boost feature to enhance the clarity and loudness of your caller's voice on the cordless handset earpiece when you are listening to a message or an announcement.

To turn on Audio Boost:

While you are on a call or listening to a message or an announcement using the handset earpiece.

Using cordless handset, press  on side of handset.

To turn off Audio Boost:

Press  on side of handset again.

Note: Audio boost function will be off after end of call.

Warning: The product may emit high volume of sound. Take Extra Care when you use audio boost key, recommend you to adjust suitable volume by setting minimum, and then turn on audio boost key.

7.6. Equalizer

The equalizer feature on the handset enables you to change the quality of the handset audio to best suit your hearing.

During a call:

1. Slide up and down  on handset to select Treble, Natural, or Bass. (refer to Section 5.1 item 13 for details).

7.7. Redial

Each Cordless handset stores the last 10 dialled numbers (up to 17 digits each) in the redial list. The redial entries are not shared by all the system handsets.

In idle mode:

1. Press .
2. Press  or  repeatedly to browse the list. The handset beeps twice at the end of the list.
3. When the desired entry displays, press  to dial.

During a call:

1. Press .
2. Press  or  repeatedly to browse the list. The handset beeps twice at the end of the list.
3. When the desired entry displays, press **OK** to dial.

8. PHONE SETTINGS

8.1. Set Ringer Melody and Volume

Set Handset ringer:

During ringing,

- Press  or  in the handset to adjust ringer volume of handset

OR

1. Press **OK** on the handset in idle mode.
2. Press  or  to select **HS SETTING**, then press **OK**.
3. Select **RING SETUP** by pressing **OK**.
4. Press  or  to select **EXT. RING**, **INT. RING** or **RING VOL**, then press **OK**,
5. After selection, press **OK** to confirm setting. You hear confirmation tones.

Set Base ringer:

1. Press **OK** on the handset in idle mode.
2. Press  or  to select **BS SETTING**, then press **OK**.
3. Repeat step 3 to step 5 of the above section.

Notes:

EXT. RING means ring tone (total 10 for handset, 5 for base) will ring when external call.

INT. RING means ring tone (total 10 for handset, 5 base) will ring when internal call (between base and handset, or among 2 or more handsets registered to the base).

RING VOL is **OFF**, **VOLUME 1** to **VOLUME 5**.

When the telephone is ringing, you can temporarily set silence for the ringer of the handset by pressing  only without disconnecting the call. The next call rings normally at the preset volume.

8.2. Set Alert Tone

You can turn on the alert tone in the cordless handset when low battery/out of range is detected and key tone can be on or off.

1. Press **OK** when idle.
2. Press **▲** or **▼** to select **HS SETTING**, then press **OK**.
3. Press **▲** or **▼** to select **tone SETUP** then press **OK**.
4. Press **▲** or **▼** to select **KEY TONE, BATT TONE, or RANGE TONE**, then press **OK**.
5. Press **▲** or **▼** to select **ON or OFF**, then press **OK**. You hear confirmation tones.

8.3. Set Date and Time Format

1. Press **OK** when idle.
2. Press **▲** or **▼** to select **HS SETTING**, then press **OK**.
3. Press **▲** or **▼** to select **DATE&TIME** then press **OK**.
4. Press **▲** or **▼** to select **DATE FORM**, then press **OK**, select your desired date format (**DD-MM-YY or MM-DD-YY**), OR
5. Press **▲** or **▼** to select **TIME FORM**, then press **OK**, select your desired time format (**24 HR or 12HR**).
6. Press **OK** to confirm. You hear confirmation tones.

8.4. Talking Digit

You can turn on or off the audible spoken tone that is spoken when you press the dialing key on handset during predialing during a call.

1. Press **OK** when idle.
2. Press **▲** or **▼** to select **TLK DIGITS**, then press **OK** to select **ON or OFF**.
3. Press **OK** to confirm. You hear confirmation tones.

Note: spoken language of talking digit is same as what language has been in Section 7.1.2.

1. Press **OK** when idle.
2. Press **▲** or **▼** to select **HS SETTING**, then press **OK**.
3. Press **▲** or **▼** to select **DEFAULT**, then press **OK**, **CONFIRMED?** Is displayed, then press **OK** to confirm. You hear confirmation tones.

8.7. Registration

Your handset and telephone base is pre-registered. If for some reason, the handset is not registered to the base station, **PUT ON BS TO POWER** will be displayed on the handset screen. If it is out of base and  disappears on the screen, register your handset according to the following procedure.

1. Make sure the handset is out of the base and shows **PUT ON BS TO POWER** before you begin registration.
2. Press and hold  on the telephone base in idle mode for around 5 seconds until incoming call light LED bar lits on the telephone base.
3. Press **OK** when idle.
4. Press **▲** or **▼** to select **HS SETTING**, then press **OK**.
5. Press **▲** or **▼** to select **REGISTER**, then press **OK**, **REGISTRNG** appears and flashes on the screen until the handset can be registered with base.

If registration fails, the telephone base screen displays **PUT ON BS TO POWER**. Pls. repeat the above procedure.

8.8. Find the Handset

You can locate the handset by pressing  once on the base station.

All the handsets registered to the base will produce the paging tone and "**PAGING**" is displayed on the LCD of the handsets.

You can stop the paging by pressing  ,  , on any handset or  on the base again.

Note: If there is an incoming call during paging, the phone will ring with the incoming call instead of paging.

8.9. Conference call

Up to 5 cordless handsets and the telephone base can join an external call at the same time.

To join a call with a cordless handset:

- Press  join the call.
- Press  or place the handset in the base or charger to exit the call.

To join a call with the telephone base:

- Press  to join the call,
- Press  again, to exit the call.

8.10. Transfer a call

During an external call, you can transfer the call from a cordless handset or the telephone base to another system device.

To transfer a call from a cordless handset:

During a call,

1. Press **OK**, then press **▲** or **▼** to select **INTERCOM**, then press **OK**.
2. If you have two or more cordless handsets, press **▲** or **▼** to select the desired device and then press **OK**.
3. The external call is put on hold and the cordless handset shows **CALLING HS 2** or **CALLING BASE** destination device rings.
4. To answer the call on the destination handset, press, , or any dialing key,

OR, To answer the call on the base, press  (speaker mode).

5. Press  on the calling handset to transfer the call to extra handset or base.

To transfer a call from the telephone base:

During a call,

1. If the handset(s) is put in base or charger, just take it away from cradle, the call will be transferred from base to handset automatically.
2. If handset(s) is out of base or charger, press  to start conference call among base and external call. Then, press  on the base to transfer the call to the handset.

8.11. Intercom

Use the intercom feature for conversations between two cordless handsets or between cordless handset and base.

8.11.1. Intercom initiated from cordless handset:

1. Press , and then press **OK**, then press **▲** or **▼** to select **INTERCOM**, then press **OK**.
2. If you have two or more cordless handsets, press **▲** or **▼** to select the desired device and then press **OK**.
3. The cordless handset shows **CALLING HS 2**, the destination device rings.
4. To answer the call on the destination handset, press, , or any dialing key,

OR, To answer the call on the base, press  (speaker mode).

9. CALLER DISPLAY (Network dependent)

This feature is available if you have subscribed the Caller Line Identification service with your telephone service provider.

Your phone can store up to 30 received calls with date/time information in the Call List. The number will be shown on the LCD when the phone is ringing. If the number matches with one of the entries in your Private Phonebook, the caller's name stored in the private phonebook will be displayed with the number.

If the caller number is disabled to send caller information, **UNAVAIL** will display. If the caller number is not provided, **PRIVATE** will display.

In standby, if three unanswered calls with different calling number are received, **"3 NEW CALLS"** will be displayed. Each time you review a call list entry marked with  icon, the number of new calls decreases by one. When you have reviewed all the new calls, the  icon no longer shows.

If the incoming telephone number matches the last 7 digits of a telephone number in your phonebook, the name that appears on the screen matches the corresponding name in your phonebook.

9.1. View the call list

All received calls are saved in Call List with the latest call putting at the top of the list. When the call list is full, the oldest call will be replaced by a new call. The latest call log is stored only when it is same calling number.

In idle mode,

1. Press **OK**, then press **▲** or **▼** to select **CALL LOG**, then press **OK** to review the calling number display history
2. Press **▲** or **▼** to browse the call log.
3. Press **OK**, **DETAILS** will show.
4. Press **OK** to view the details of the call log including date and time. (Date/Month and Time appears in left and right sides of lower row respectively)

To remotely access your answering machine remotely:

You can ring your phone from another tone-dialing phone to switch on or off the answering machine and listen to your messages remotely.

1. Place a call from a tone-dialing phone to your phone.
2. When the answering machine answers the calls and starts playing the outgoing message, enter  key and then 2-digit remote access code (00 is the preset code).
3. Then the following description will operate by pressing the following key in your tone-dialing phone.

Key	Description
2	Play all messages.
4	Repeat the current message or press twice for the previous message.
5	Delete the message currently being played.
6	Skip to the next message.
7	Turn on the answering machine.
9	Turn off the answering machine.

Notes:

- After 5 seconds of key inactivity, the answering machine automatically cuts off communication.
- When the answering machine is turned off, the telephone answers after 14 rings, and plays the outgoing message.

14.6.5. Message Alert Tone

When the message alert tone is set to **On**, the telephone base beeps every 10 seconds to alert you to new messages. The tone stops when all new messages have been reviewed.

1. Press **OK** in idle mode.
2. Press **▲** or **▼** to select **ANS. SYS**, then press **OK**.
3. Press **▲** or **▼** to select **SET TAM**, then press **OK**.
4. Press **▲** or **▼** to select **MSG ALERT**, then press **OK**.
5. Press **▲** or **▼** to select **ON** or **OFF**, then press **OK** to confirm. You hear confirmation tones.

Pressing any telephone base key temporarily silences the message alert tone. The message alert tone plays with the next incoming message.

15. TECHNICAL SPECIFICATIONS

Number of Handsets	Up to 5
Intercom Mode	Yes
Three-Way Conference	Yes (1 outside correspondent + 2 internal correspondents)
Electrical Connection/Base Mains Adaptor/Charger	<p>Base: Model No.: CS6F060080FGF, CS6F060080FBF, S006AKB0600080 Input: 100-240 V/50-60 Hz/0.2 A Output: 6 V DC/800 mA</p> <p>Charger: RJ-AS060450E002, RJ-AS060450B001, VT04EEU06045, VT04EUK06045 Input: 100-240 V/50-60 Hz/0.15 A Output: 6 V DC/450 mA</p> <p>Only use the adaptors supplied with telephone. Single-phase AC, excluding IT install defined by the EN60950 standard.</p> <p>Caution: The network voltage is classified as hazard by the criteria of this standard.</p>
Telephone Connection	Appliance designed for connection to a TNV3 class (telecommunications network voltage) analogue telephone line as defined by the EN60950 standard.
Batteries	AAA NiMH batteries– 1.2 V (3 pieces) Only use the batteries supplied with the telephone. Use any other type of battery presents a risk of explosion. Used batteries must be disposed of in compliance with current environmental protection regulations.
Operating Temperature	From 5°C to 40°C

* Values may vary according to environment.

** Depending on initial battery charge.

16. TROUBLESHOOTING

If you have difficulty with your phone, please try the suggestions listed below.

As a general rule, if a problem occurs, remove the batteries from all the handsets in your installation for about 1 minute, then disconnect and reconnect the power supply to the base and reinstall the handset batteries.

Phone does not work

- Make sure you installed the batteries correctly.
- Check that the mains power is correctly connected for the base and charger

“NO LINE” appears in the screen

- Is the telephone cord plugged into the phone socket?
- Only use the telephone cord supplied with the phone.
- The telephone line cord might be malfunctioning. Install a new telephone line cord.
- Disconnect the telephone and connect a different telephone. If there is no dial tone on this telephone, the problem is in your wiring or local service. Contact your local telephone company.

No dial tone

- Is the telephone cord plugged into the phone socket?
- Check that the mains power is switched on.
- Only use the telephone cord supplied with the phone.
- The telephone line cord might be malfunctioning. Install a new telephone line cord.
- Move the cordless handset closer to the telephone base. It might be out of range.
- Disconnect the telephone and connect a different telephone. If there is no dial tone on this telephone, the problem is in your wiring or local service. Contact your local telephone company.

Cannot dial out or receive calls

- Check that the mains power is correctly connected.
- The battery may need recharging.
- Has there been a power cut? If so, place the handset back on the base for 10 seconds and try again. If it still does not work disconnect the batteries and mains power for 10 minutes, then reconnect and try again.
- If you are connected to a PABX, check whether you need to dial an access code.

Your own voice cannot be announced when the telephone number of incoming call is same as 1 of 4 photo memories stored

- The ringer volume may be switched off.
- Voice recording in 1 of 4 photo memories was not done successfully. Please refer to Section 7.3 to record again.
- Your telephone line may not be subscribed or availability of the service from the fixed line operator.

Cordless handset does not ring

- The ringer volume may be switched off.
- Check that the mains power is correctly connected.
- Make sure the cordless handset is registered to the base.

No display in cordless handset

- The batteries may be flat, dead or incorrectly inserted.
- Recharge or replace the batteries

Handset displays “PUT ON BS TO POWER”

- Check that the mains power is correctly connected.
- Check that the cordless handset is within range of the base.

No voice tag announcement from cordless handset during ringing

- It should become normal after 1 minute in idle mode without any operation of the phone.

You hear the busy tone when you press key on handset

- Make sure the cordless handset is in range of the base.
- Another cordless handset registered to your telephone base may be on the line.

Buzzing noise on my phone or on other electrical equipment nearby

- Sometimes your phone can interfere with other electrical equipment if it is placed too close. It is recommended that you place your phone at least one metre away from electrical appliances or metal obstructions to avoid any risk of interference.
- If you have an ADSL internet service ensure correct filters are installed to prevent interference.

Answering machine does not record any messages

- Make sure the answering machine is switched on.
- The memory may be full, please delete some old messages to free up space.

Cannot access your messages from another phone

- Have you changed the remote access security PIN code?
- Make sure you are calling from a touch-tone telephone. When dialling a number, there should be tones.

- The answering machine might not detect the remote access code when your outgoing message is playing. Try again to press remote access code quickly.
- There might be interference on the telephone line you are using. Press the dial pad keys firmly when dialing.

Voicemail and  show on the display and I don't know why.

Your telephone has voicemail indication that is separate from the built-in answering system. If  appears on the display, then your telephone has received a signal from your telephone service provider that you have a voicemail message waiting for you to retrieve from your telephone service provider. Contact your telephone service provider for more information on how to access your voicemail.

The store where you bought your telephone can also provide you with information and after-sales support.

17. SAFETY

In the event of an electrical hazard, the mains adapter acts as 230V power isolating device. It should therefore, as a precaution, be installed close to the appliance and be easily accessible. To disconnect the device from the primary power source, the mains adapter must be removed from the 230V AC/50 Hz socket.

If the mains adapter fails, it must be replaced by an identical model.

We recommend that you also keep a conventional telephone – one that doesn't require a power supply – as a backup.

! Do not use your telephone to notify a gas leak when standing in the vicinity of the leak.

It is recommended that you avoid using this device during electrical storms.

Do not attempt to open the batteries, as they contain chemical substances. In the event of leakage, avoid contact with the skin, eyes, nose and mouth. In the event of contact, rinse the affected part for about twenty minutes with running water and seek urgent medical attention. Clean the product with absorbent paper or a dry cloth and contact your reseller for replacement batteries.

Hereby, ATLINKS EUROPE declares that the radio equipment type DECT is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: www.swissvoice.net

Maximum Output Power (NTP) : 24dBm

Frequency Range : 1880-1900MHz

Swissvoice Xtra 2155

18. ENVIRONMENT

This symbol means that your inoperative electronic appliance must be collected separately and not mixed with the household waste. The European Union has implemented a specific collection and recycling system for which producers are responsible.

This appliance has been designed and manufactured with high quality materials and components that can be recycled and reused. Electrical and electronic appliances are liable to contain parts that are necessary in order for the system to work properly but which can become a health and environmental hazard if they are not handled or disposed of in the proper way. Consequently, please do not throw out your inoperative appliance with the household waste.

If you are the owner of the appliance, you must deposit it at the appropriate local collection point or leave it with the vendor when buying a new appliance.

- If you are a professional user, please follow your supplier's instructions.
- If the appliance is rented to you or left in your care, please contact your service provider.

Keen to preserve the environment, ATLINKS has equipped this appliance with a switching power supply, offering better energy efficiency. The advantages include not only very low electricity consumption, but also a more compact format than the conventional power supply units used by the previous range.

The used batteries from your telephone (if it has batteries) must be disposed of in compliance with current environmental protection regulations. Comply with your local regulations.

Return your batteries to your reseller or dispose of them at an approved recycling centre.

Help us protect the environment in which we live!
