

## 1452 - Always Ready Night Light Torch

The mounted dock plugs straight into a wall socket.

To charge the torch, simply place the night light into the mounted dock.

The torch has a switch at the rear with 4 settings. There are (from top to bottom):

- **Off:** Turn off.
- **On:** Turn on the torch.
- **Auto:** Turn on the automatic function of the night light. The light will come on when movement is detected in the dark.
- **On:** Turn the night light on permanently.

All the torch and night light functions can be used either in or out of the mounted dock. The product can also be mounted using the useful mounting hole.
