- Lightweight with adjustable height to suit different users
- Triple fold to reduce size to a minimum for storage, transport and travel
- Backrest and comfortable seat to allow use as a chair
- Large diameter wheels with high-grip tyres and lockable brakes for safety
- Walking stick holder and large-capacity removable bag for convenience

## 4 Wheel Triple Fold Aluminium Rollator

### Product Description

A lightweight rollator to help users who have difficulty or lack confidence when walking. The triple fold design makes this rollator suitable for users who need a more compact size for storage or travel. Users can easily adjust the handle height to suit their needs. Brake levers on each handle control the brakes on the two rear wheels. They also include a locking mechanism for added safety. The large diameter high-grip wheels allow the rollator to roll along most surfaces while keeping control. A back-rest and seat allow use of the rollator as a chair. The simple folding mechanism allows the user to easily collapse and store the rollator - useful when loading into a car boot or storage cupboard.

The rollator includes a walking stick holder and removable large-capacity bag to hold items, keeping hands free for safety.

### Product Technical Details
