

NUVO™ Adjustable Bath Steps

Description	Product Code
1 x NUVO Bath Step, 2 NRS Bath Steps & Pillars	S09347
1 x NUVO Bath Step and Pillars	S20677

Features and Benefits

- Lightweight modular steps for ease of use
- Non-slip surface and feet pads for improved safety
- Different options to give adjustable heights and slopes
- Simple interlocking assembly, with no tools needed
- Polypropylene material for durability and easy cleaning

Product Description

A modular system of lightweight but sturdy steps and pillars to help users safely transfer in and out of baths or showers, or for extra height when using a sink or toilet.

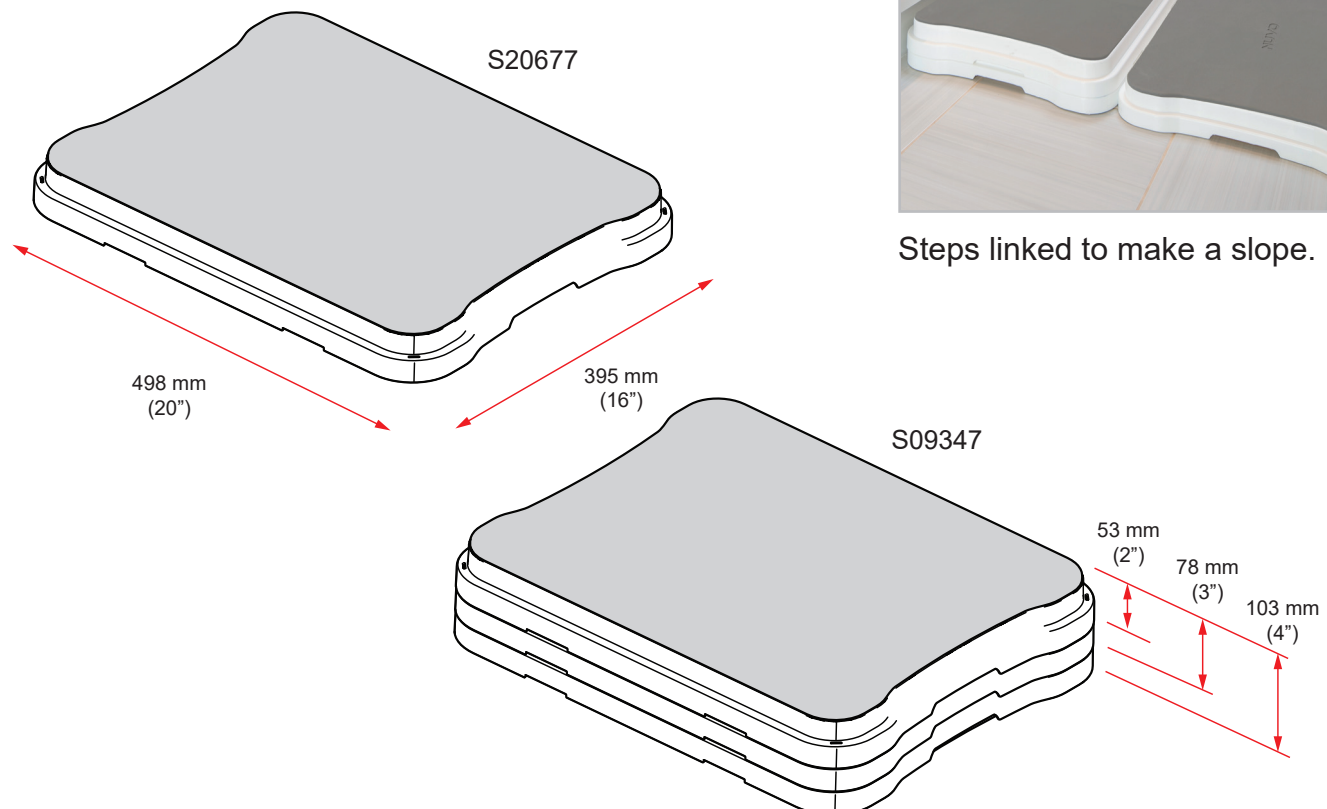

- Product S09347 has one NUVO™ step that has the over-moulded grey non-slip covering and works as the top step. It also has two standard NRS steps without the over-moulding, that simply fit under the top step to increase it's height if needed. The support pillars add strength to the steps to prevent them bending when the user applies their weight.
- Product S20677 has one NUVO™ step that has the over-moulded grey non-slip covering and a set of pillars.

All steps and support pillars have small rubber non-slip feet. Each step has locking lips and slots on one edge to interlock safely with other steps fitted alongside when creating a slope, and each step fits inside the others when adding height. The pillars fit inside any step.

The user can buy just product S09347, but adding product S20677 alongside gives the ability to create a more gradual slope of non-slip steps. Adding another S09347 or the other spare products gives more options for height and slope, to the maximum height.

Product Technical Details

- Polypropylene construction.
- Adjustable heights from 53 mm (2") to 103 mm (4") with one pack of S09347, or up to a maximum 178 mm (7") with additional steps.
