

## **Pan Pickle Instruction Manual**

### **Safety**

Pan pickles are made from temperature resistant silicone.

but gas and electric coil hobs operate in temperatures much higher than this material can handle

This product is not designed for direct heat, Do not use with electric hobs

Induction Hobs magnetically heat the bottom of the pan, and produce minimal heat elsewhere.

They are therefore safer to use with pan pickles.

### **Possible Uses**

Pan Pickle is a product for holding round objects in place around the kitchen and home, here are some uses.

- Holding pan in place while cooking on induction Hobs.
- Indicating where rings are in induction hobs.
- Securing Mixing bowls on counter tops.
- Keeping plates and bowls in place while eating.
- Creating 'known locations' for bowls and other containers around the house.

### **Instructions**

#### **1.Clean Pan Pickle**

Before use, clean the pan pickle by running it under warm water, they can be cleaned between uses with just water, and dish soap if required.

#### **2.Clean your surface**

For best grip make sure the surface you wish to use is dry, and clear of dust and grease. Pan Pickle will grip best to glass and other smooth surfaces

#### **3.Place Pan Pickle**

Pan Pickles can be peeled up and reused, so feel free to find the most helpful location, some use a pair to securely hold a single pan, others use one per pan.

#### **4.Press down for a better grip**

Pan Pickles hold in place best when they have good contact to a surface, pressing down on it before use will ensure it stays where you want.
