

MEMO MINDER MKII

Introduction

The Memo Minder MKII is a battery or AC powered solid state media player which records your personalised message, (No Tape Required). Your message is recorded onto a circuit board then played when the passive infrared motion detector is triggered. The unit has many home safety and security applications, as well as being a useful tool for health and safety procedures. Serves many other purposes within the home and work environment.

Record Mode

1. Move the side switch located on the side of the unit to "RECORD", when red LED is lit unit is recording
2. For the best quality playback sound record your message at a distance of 6" (15cm) from the microphone.
3. Record time is 1-20 seconds when unit is full the red LED will switch off. The recording can be stopped at any time by returning the slide switch to the off position.
4. Any new message recorded will record over previous ones.

Auto-Player Mode

1. After you have recorded your message move the slide switch to "AUTO PLAYER".
2. Wait 20 seconds to allow the unit to stabilise. Once stabilised the unit will detect any movement in the detection area and play recorded message once. Continued movement once the unit has reset (approx 30 seconds including message) will cause message to trigger again.
