- A choice of three different sizes to suit the needs of the user
- Suction cup feet for enhanced stability and security
- Slatted design for excellent drainage
- Supplied already assembled - no tools needed

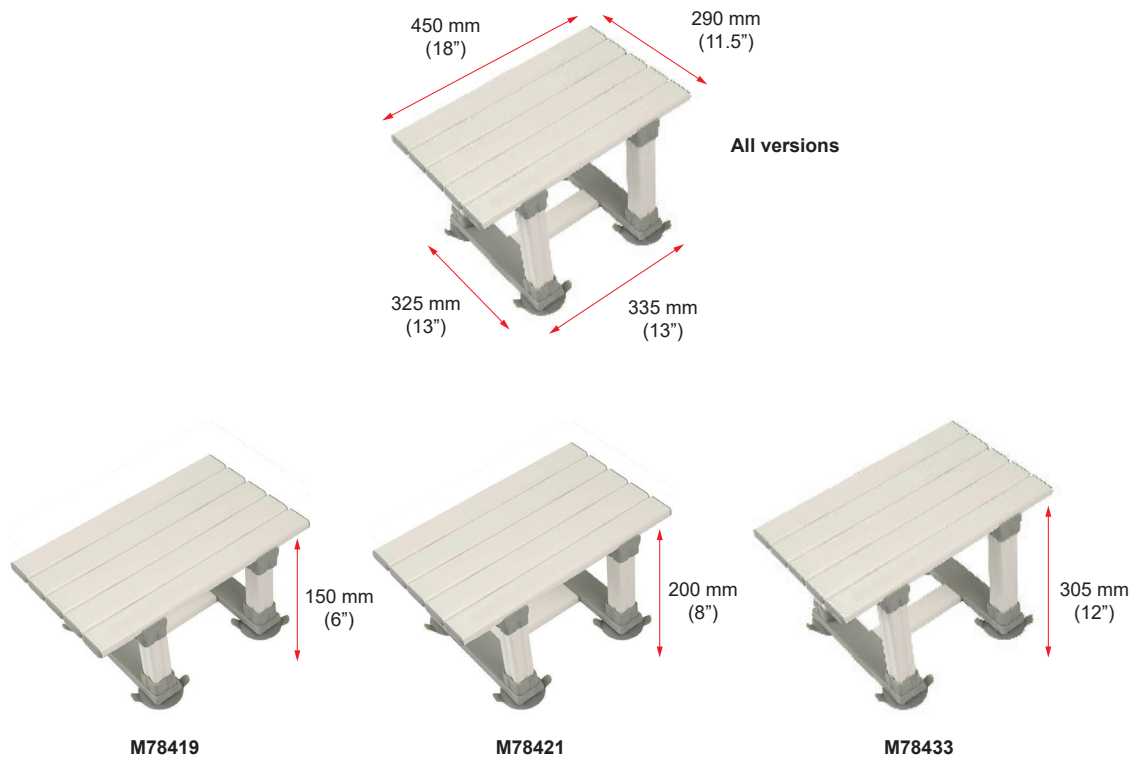

Slatted Bath Seats

Product Description

Bath seats of three height options to suit different users and different bath types. They help people who struggle when using the bath by allowing a raised bathing position. For best results we recommend that you use these seats with our bath boards, which help when getting in and out of your bath. These designs use slatted boards as a seat to help water to drain away. They also have large sucker-style feet to help stick to the bottom of the bath for security. The wide seat design coupled with the large sucker feet produce a stable and safe seating position.

Product Technical Details
